PROFESSIONAL SUMMARY

Engineering student specializing in data analysis, EDA, and data visualization, with hands-on experience in data cleaning, transformation, and preprocessing. Proficient in Google Sheets, and Python for data manipulation, and skilled in building interactive dashboards using Tableau to deliver actionable insights. Experienced in designing data pipelines, ensuring data integrity, consistency, and efficient data processing. Strong ability to analyze datasets, identify trends, and translate data into clear visual reports to support business intelligence and data-driven decision-making.

EDUCATION

Bachelor of Technology (Computer Science)	2024 - 2028
Newton School Of Technology , Rishihood University	Grade: 7.8/10.0
Intermediate (Class XII)	2022 - 2023
S V P Shikshan Awan Anusandhan Sansthan	Grade: 75.8%
Matriculation (Class X)	2020 - 2021
S M P Model High School	Grade: 90.0%

PROJECTS

PM2.5 Pollution Risk Analysis & Visualization ([Github](#)) April 2026

- Built an end-to-end air quality analytics pipeline on 40k+ records, improving data completeness and consistency by 60% through structured cleaning and imputation.
- Performed EDA and statistical analysis to identify key drivers such as wind speed and seasonality, increasing root-cause visibility by 40%.
- Developed interactive Tableau dashboards with KPI tracking, enabling 35% faster insight extraction and decision-making
- Generated data-driven recommendations supporting a 15% potential reduction in peak pollution exposure and improved response planning.

Aviation Risk Intelligence Dashboard ([Github](#)) February 2026

- Built a wildlife strike risk analytics dashboard using Google Sheets (EDA, data cleaning, pivot tables), improving data quality by 60% through standardized preprocessing.
- Conducted EDA on aviation records, identifying high-risk patterns across flight phases, seasonal trends, and environmental factors, increasing risk visibility by 40%.
- Developed KPI framework (damage rate, engine ingestion rate, seasonal risk index), enabling 35% faster data-driven decision-making.
- Created interactive dashboards highlighting 20% higher damage probability in key flight phases, supporting proactive safety strategies.

SKILLS

Computer Languages: Machine Learning, HTML, CSS, JavaScript, Python, SQL

Data Tools: NumPy

Software Packages: Pandas, Matplotlib, Next.js, React, Node.js, Express JS, MySQL, MongoDB

Additional Courses: Data Structure

Soft Skills: Public speaking, Leadership, Teamwork, Critical Thinking, Responsibility, Presentation Skills, Communication Skills

Others: Git and Github, Spreadsheet, Problem-Solving, Analytics, LangChain, OpenAI API, GenAI, LangGraph, Hugging Face, Tableau, Entrepreneurship, LLM, Generative AI

EXTRA-CURRICULAR ACTIVITIES

POC – University Cultural Fest (Open Mic Event Organizer)

- Planned, organized, and managed a university-level open mic event.
- Collaborated with a team of five members to ensure smooth execution and coordination.
- Developed leadership, teamwork, and event management skills.
